SKILLS: Ruby, Ruby on Rails, RSpec, JavaScript, jQuery, React, Redux, SQL, Git, HTML5, CSS3

PROJECTS:

Yuup (Yelp clone) *Ruby on Rails, ReactJS, Redux, Geolocation, AWS, Google Maps API*

[live](#) | [github](#)

Yuup is a clone of Yelp that interacts with multiple location APIs, User authentication, AWS and displays full CRUD functionality.

- Integrated a user authorization that uses BCrypt and Protected Routes to securely save encrypted passwords
- Implemented Geolocation API to auto fill search location parameters as soon as a user logs in
- Restaurants images, and users images are saved remotely on AWS
- Streamlined each independent page to best display information as cleanly as possible

Texas Hold 'Em Odds Calculator *JavaScript, CSS, D3*

[live](#) | [github](#)

This Odds calculator allows you to see the chance of your hand winning against any other poker hand with however many cards there are left to fall.

- Designed a Monte Carlo system of playing out 10'000 poker hands to display each players odds of winning, generated as each card falls
- Utilized D3 and vanilla JS to translate information onto the screen in clear and concise ways
- Pioneered an interface for individuals to check their hand strength against that of their opponents
