SKILLS: Ruby, Ruby on Rails, RSpec, JavaScript, jQuery, React, Redux, SQL, Git, HTML5, CSS3

PROJECTS:

Yuup (Yelp clone) *Ruby on Rails, ReactJS, Redux, Geolocation, AWS, Google Maps API*

[live](#) | [github](#)

Yuup is a clone of Yelp that interacts with multiple location APIs, User authentication, AWS and displays full CRUD functionality.

- Integrated a user authorization that uses BCrypt and Protected Routes to securely save encrypted passwords and allows persistent authorization across multiple sessions using cookies
- Leveraged Geolocation AP's JSON results to autofill search location parameters as soon as a user logs in
- Saved restaurants images, and users images remotely on AWS, improving performance and scalability.
- Streamlined one page using React and Redux to give a seamless user experience without constant refresh

Texas Hold 'Em Odds Calculator *JavaScript, CSS, D3*

[live](#) | [github](#)

This Odds calculator allows you to see the chance of your hand winning against any other poker hand with however many cards there are left to fall.

- Designed a custom algorithm of playing out 10,000 poker hands to display each players odds of winning, generated as each card falls
- Utilized D3 and pure JS to calculate results based on user input
- Implemented an interface for individuals to check their hand strength against that of their opponents
